The blank is first kept on the die plate. The punch slowly descends on the blank and forces it to take the cup shape formed by the end of the punch, by the time it reaches the bottom of the die. When the cup reaches the counter bored portion of the die, the top edge of the cup formed around the punch expands slightly due to the spring back.

Sheet metal operations 8b. Drawing Tools

Multiple stamping operations may be performed within a single die, or at a number of die stations within a die set and with a single stroke of the press. Single station dies can be either compound dies or combinations dies. A compound die performs basic cutting operations such as blanking and hole punching to produce parts.

chose to die. His Father ordained it. He embraced it. His Passion Was Vindicated by the Resurrection Because of this unparalleled passion, God raised Jesus from the dead. It happened three days later. Early Sunday morning he rose from the dead. He appeared numerous times to his disciples for forty days before his ascension to heaven (Acts 1:3).
