Research has shown the extraordinary impact that ultra-short bursts of HIT (high intensity training) can have, whatever your age or level of fitness. Fast Exercise is for those who donâ€™t enjoy exercise but want to lose fat and stay healthy. It is for those who love exercise and want to get the most from it.

## **Fast Exercise Â» Welcome to HIT: fitter, stronger, better**

Fullbody workouts are making a comeback as research seems to indicate that natural bodybuilders are better off training more frequently, rather than once per week. Now if you think about HIT training, it is really just a fullbody workout with a more moderate volume. Here are the staples of HIT training: Frequency - Train only 2-3x per week.
